

# Do You Want to Help Fight Stigma?

The Partnership Program is currently looking for people directly affected by mental illness (schizophrenia, schizoaffective disorder, bipolar disorder, anxiety disorder, and depression) to share their stories of recovery.

We also need family members of people with mental illness to share how families are affected by mental illness.

Mental health professionals of all kinds are welcome to join the program to present the facts on mental illness.

You can make a difference in the fight against stigma!
